About Relifix

Relifix is a leading MEP

contracting company based in Dubai, providing expert Mechanical, Electrical, and Plumbing (MEP) solutions across diverse sectors, including residential, commercial, and industrial. With a strong reputation for quality, safety, and innovation, we deliver comprehensive, turnkey solutions tailored to modern infrastructure needs. Our experienced team of engineers and technicians, combined with advanced technology and deep industry knowledge, ensures every project, from high-rise towers to villas, is executed with precision, efficiency, and full compliance. We integrate smart technologies and sustainable practices, emphasizing timely delivery, budget-friendly execution, and long-term client support. At Relifix, we believe in building lasting partnerships, not just structures, powering your spaces with excellence and exceeding expectations.

Mission & Vision

At Relifix, our mission is to deliver engineering excellence through safe, efficient, and sustainable MEP services. We aim to set new standards in the industry by combining innovation, craftsmanship, and environmental responsibility. Guided by integrity and technical expertise, we envision becoming the go-to partner for complex engineering challenges in Dubai—trusted for our reliability, performance, and customer-first approach.

- Founded: [2024]
- Headquarters: Dubai, UAE
- Core Services: MEP Contracting

**Engineering
Tomorrow's
Infrastructure**

Our Core Expertise:

At Relifix, we offer a comprehensive range of MEP services tailored to meet the complex needs of modern construction projects across the UAE. With a commitment to engineering excellence and client satisfaction, our expertise spans across four key domains:

Additional Services

- Design & Build solutions
- Drawings and authority approvals
- After-sales service contracts
- Facility management & maintenance

Plumbing Works

- Water supply & drainage systems
- Sanitary ware installation
- Pumping stations & waste management

Electrical Works

- Power distribution & lighting systems
- Low and medium voltage works
- Home automation services

Mechanical Works

- HVAC design, installation & maintenance
- Ventilation and air filtration systems
- Firefighting & fire protection systems

With a focus on safety, efficiency, and compliance, Relifix is your trusted partner for turnkey MEP solutions—from concept to completion.

At Relifix, our mechanical services form the backbone of every efficient and sustainable building system. With a focus on performance, reliability, and compliance, we ensure each solution is tailored to meet the specific needs of every project.

HVAC Design, Installation & Maintenance

Our HVAC (Heating, Ventilation, and Air Conditioning) services are built on a foundation of engineering precision and energy efficiency. From initial design to seamless installation, we deliver customized climate control systems that meet both international standards and client expectations.

We work with leading equipment brands and smart technologies to ensure long-term performance and low operational costs. Our preventive maintenance plans reduce breakdowns, extend equipment life, and optimize indoor comfort year-round.

Ventilation and Air Filtration Systems

Healthy air means healthy spaces. At Relifix, we design and install advanced ventilation and air purification systems that ensure constant airflow, reduced humidity, and cleaner indoor air—crucial for both residential and commercial environments.

Our systems are equipped to remove pollutants, airborne bacteria, and odors, contributing to a safer and more comfortable living or working environment. Whether it's a high-rise tower or a retail space, we ensure indoor air quality meets global health standards.

Firefighting & Fire Protection Systems

Safety is non-negotiable. That's why our mechanical division includes the design and installation of state-of-the-art firefighting and fire protection systems.

From sprinklers and fire pumps to hose reels and fire extinguishers, we ensure full compliance with Dubai Civil Defence regulations and other international codes.

We work closely with clients to implement tailored fire safety plans that are integrated seamlessly into the building's mechanical systems—protecting both people and property with zero compromise.

■ Power Distribution & Lighting Systems

We design and implement robust power distribution networks and energy-efficient lighting systems tailored to each project's scale and function. From main panels to final circuits, every connection is executed with precision and full compliance with UAE regulations.

■ Low and Medium Voltage Works

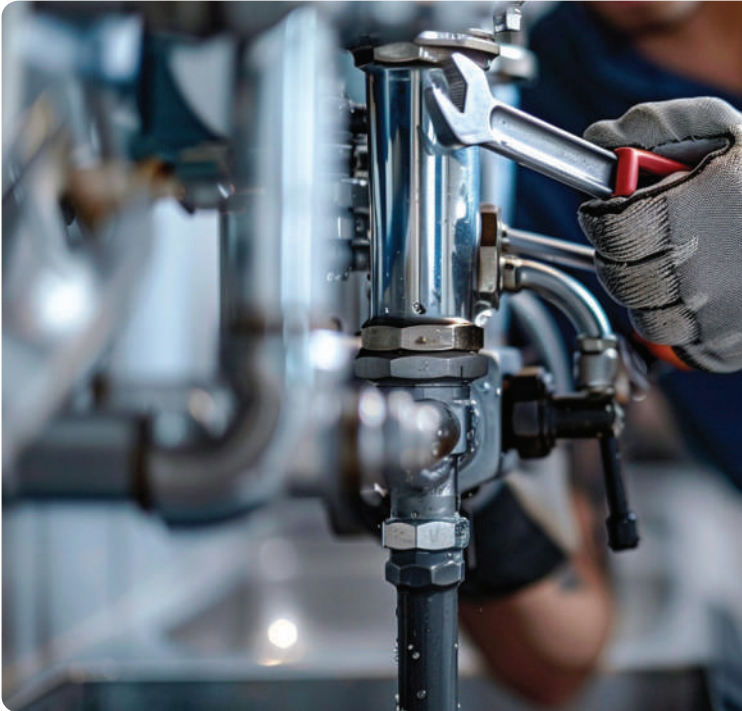

Our expertise covers the installation and integration of low and medium voltage systems including transformers, switchgear, cabling, and protection systems. We ensure stability, load balance, and long-term operational safety—critical for modern infrastructure.

■ Home Automation Services

Relifix brings smart technology into your space through seamless home automation solutions. From lighting and HVAC control to security and energy monitoring, we create intelligent systems that offer convenience, control, and energy savings—all at your fingertips.

At Relifix, we offer fully integrated plumbing solutions that ensure water flows efficiently, safely, and sustainably through every structure we serve. From planning to execution, our plumbing services are delivered with technical precision and full regulatory compliance.

■ Water Supply & Drainage Systems

We design and install comprehensive water supply and drainage networks that ensure uninterrupted flow, pressure balance, and proper waste discharge. Our systems support both residential and commercial projects with long-term performance and durability in mind.

■ Sanitary Ware Installation

Our team provides precise installation of high-quality sanitary fixtures—including toilets, washbasins, faucets, and accessories. We ensure every unit is fitted with attention to detail, ensuring both functionality and aesthetic integration with interior designs.

■ Pumping Stations & Waste Management

Relifix installs and maintains efficient pumping systems for water transfer and sewage management. From submersible pumps to control panels and tank systems, we implement solutions that optimize flow, reduce energy use, and support environmental safety.

Beyond core MEP solutions, Relifix provides a range of integrated services that support project execution, compliance, and long-term operational efficiency. These offerings make us a true turnkey partner for construction and facility development.

■ Design & Build Solutions

We offer complete design and build packages, streamlining project delivery under a single point of responsibility. From concept to handover, our team ensures coordinated execution with reduced risk, faster timelines, and controlled costs.

■ Drawings & Authority Approvals

Relifix handles technical documentation and secures all necessary approvals from local authorities, ensuring smooth project progression. Our knowledge of UAE regulatory requirements guarantees full compliance and avoids costly delays.

■ After-Sales Service Contracts

We provide tailored maintenance and support contracts to keep your MEP systems running optimally. Whether preventive or corrective, our after-sales services ensure long-term performance and reduce unexpected downtime.

■ Facility Management & Maintenance

Our facility management solutions cover everything from routine inspections to emergency repairs. With trained personnel and 24/7 support, we keep buildings functional, safe, and energy-efficient year-round.

At Relifix, our operational framework is built to deliver precision, predictability, and performance. Every project is handled with a structured approach that ensures quality, coordination, and control—at every stage.

Project Controls

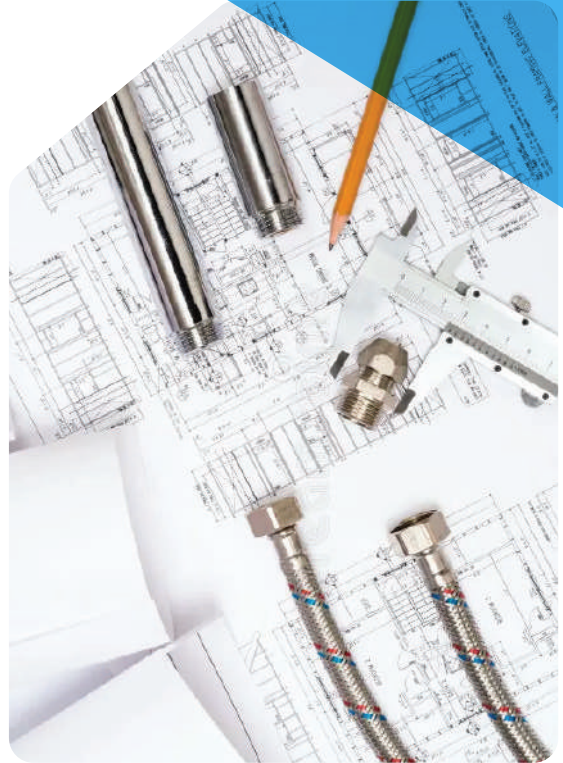

We implement advanced project control systems to manage cost, schedule, resources, and risk from day one. Our team uses real-time tracking tools, progress reports, and performance benchmarks to ensure every milestone is met without compromise.

Project Coordination

Smooth execution starts with seamless coordination. Our operations team facilitates constant communication between engineers, clients, consultants, and subcontractors—keeping everyone aligned and informed. From design clarifications to site logistics, we ensure zero missteps.

Quality Controls

Quality is not just a deliverable—it's a discipline. At Relifix, we follow strict quality assurance and quality control (QA/QC) protocols across all phases of work. Site inspections, testing, documentation, and compliance checks are part of our daily routine to meet international standards and client expectations.

At Relifix, quality is the foundation of everything we do.

We are committed to delivering MEP solutions that consistently meet or exceed client expectations, regulatory requirements, and international standards. Our Quality Policy reflects our dedication to engineering excellence, operational discipline, and continuous improvement across all our projects and services.

To fulfill this commitment, we have established a comprehensive Quality Management System (QMS) that guides our processes from project planning to final handover. Our systems and procedures are aligned with ISO 9001 standards, and are regularly reviewed to ensure ongoing effectiveness and compliance.

Our approach to quality is based on the following key principles:

- Customer Satisfaction:** We strive to understand and fulfill each client's unique requirements through clear communication, tailored solutions, and responsive service.
- Process Control:** Each phase of work is governed by standardized procedures, detailed documentation, and regular inspections to ensure consistency and accuracy.
- Continuous Improvement:** We actively monitor performance metrics, gather feedback, and invest in training and technology to continually improve our methods and outcomes.
- Responsibility & Accountability:** Quality is everyone's responsibility. From management to on-site technicians, each team member is empowered to uphold and protect our quality standards.
- Compliance & Safety:** All works are executed in full compliance with local authority regulations and industry safety guidelines to protect people, assets, and the environment.

At Relifix, we believe that quality is not just a goal—it is a culture. Through teamwork, expertise, and a relentless pursuit of excellence, we ensure that every project we deliver stands as a testament to our values and our commitment.

At Relifix, we are proud to collaborate with some of the most respected names in real estate, construction, and development across the UAE. Our track record is built on trust, transparency, and technical excellence—values that have earned us long-term partnerships with industry leaders.

Our Esteemed Clients Include:

- **Emaar**

One of the world's most valuable and admired real estate development companies, known for iconic projects such as Burj Khalifa and Downtown Dubai.

- **Dubai Holdings**

A global investment company with a diverse portfolio in real estate, hospitality, and infrastructure.

- **Nakheel**

Master developer of world-renowned projects like The Palm Jumeirah, committed to innovative and sustainable urban living.

- **Ahad Real Estate**

A forward-thinking real estate developer delivering modern residential and commercial properties in Dubai.

- **Intelspace Building Contracting LLC**

A dynamic contracting firm focused on quality construction and client satisfaction across a variety of project types.

Strategic Collaborations

Relifix works hand-in-hand with consultants, subcontractors, and government authorities to ensure each project is completed efficiently, safely, and in full compliance. Our collaborative ecosystem strengthens our ability to deliver turnkey MEP solutions across diverse sectors.

At Relifix, we take pride in delivering high-performance MEP solutions for some of Dubai's most prestigious developments. Our experience in large-scale residential projects showcases our technical capabilities, design precision, and commitment to quality across every detail.

Our team has successfully executed a wide range of mechanical, electrical, and plumbing works in high-end communities and iconic developments across the UAE.

Highlighted Projects

- **Luxury Villas – Palm Jumeirah**

Complete MEP installation for premium beachfront residences with bespoke HVAC and smart systems.

- **Dubai Hills**

Mechanical and electrical services for a series of mid-rise residential buildings with energy-efficient systems.

- **MBR City (Mohammed Bin Rashid City)**

Full MEP scope for modern luxury villas and townhouses in this expansive mixed-use community.

- **Emirates Hills**

Customized electrical and plumbing systems for ultra-luxury private residences.

- **Meadows & Jumeirah Park**

Residential MEP execution with a focus on community-wide infrastructure integration and water efficiency.

- **Downtown Dubai & Dubai Marina**

Interior MEP works and upgrades for high-rise apartments and residential towers in premium city zones.

Each of these projects reflects our core values: precision, performance, and partnership. We approach every job—no matter the size—with the same attention to detail and drive for excellence.

HSE Policy

At Relifix, safety is at the heart of our operations. We are fully committed to protecting the health and well-being of our employees, clients, subcontractors, and the communities in which we work.

Our HSE policy is built on the principles of prevention, awareness, and accountability. We strictly follow all UAE HSE regulations and international safety standards, conduct routine site inspections, and promote a zero-incident culture across all our projects.

Our Leadership

Relifix is led by a team of seasoned professionals with decades of experience in MEP engineering, project management, and construction. Our leadership blends deep technical knowledge with strong business acumen, ensuring every project is executed with precision, integrity, and vision.

Their hands-on approach and commitment to excellence drive our success and long-term client relationships.

Certifications & Compliance

Relifix is fully licensed and compliant with local authority regulations and international standards. Our certifications include:

- ISO 9001 – Quality Management
- ISO 14001 – Environmental Management
- ISO 45001 – Occupational Health & Safety
- Dubai Municipality & Civil Defence Approved
- Registered Contractor with DEWA & SEWA

We continuously audit and update our processes to ensure full compliance and operational transparency.

Led by vision. Backed by standards. Committed to safety

Let's Build the Future Together

At Relifix, we believe in engineering more than just systems—we build trust, reliability, and long-term value into every project. Whether you're developing luxury residences, commercial towers, or infrastructure projects, our team is ready to support your goals with precision and professionalism.

We invite you to connect with us and discover how our MEP expertise can bring efficiency, safety, and sustainability to your next project.
